

How to Use Your Cosy Calf Jacket

1. Place jacket over back of calf.
2. Fasten the chest clips. Adjust if necessary.
3. Fasten the belly straps. These can be crossed or left straight.
4. Adjust the belly straps to allow hands width (about 4 inches) between the calf's belly and the strap to allow for the belly to expand when lying down.
5. Check belly strap length regularly for growth.
6. Attach the leg straps. Crossed is best.
7. Shorten leg straps to allow free movement but not hanging loose.

Ideally fit the jackets whilst the calf is feeding to avoid over handling and causing stress.

Washing Instructions

1. Wash jackets every time you change the calf wearing it.
2. Pre-soak or hose lightly with a pressure washer if heavily soiled.
3. Use normal washing machine detergent and machine wash at 40 to 50 degrees centigrade.
4. Do not bleach.
5. Line dry or hang overnight in an aired room.
6. Do not tumble dry.
